Workshop

SAPROF & HCR-20 Version 3

Historical Clinical Risk Management & Structured Assessment of PROtective Factors for violence risk

Wednesday 8 and Thursday 9 May 2019

The Met Hotel, King Street, Leeds, LS1 2HQ

9am Registration, 9.30am Welcome and 4.30pm, Close (both days)

HCR-20 tool is the world's leading Violence Risk Assessment instrument. It's a practical tool for clinical assessment of risk of violence in the mentally disordered, in forensic and general adult psychiatric services. HCR-20 is designed to assist individual clinicians and multidisciplinary teams form structured, evidence based, individual risk management plans. SAPROF is a structured checklist designed for you to use alongside tools such as the HCR20v3. The addition of the structured assessment of protective factors creates a more balanced risk assessment for future violence risk, enabling a more positive approach to violence prevention and aiding formulation, evaluation and risk communication.

This two day workshop will familiarise you with both HCR20v3 and SAPROF tools, teaching you to use them in your clinical practice. This course is also suitable for you if you have already attended the previous HCR version training.

This course aims to provide delegates with:

- More familiar with the basic principles of the assessment and management of the risk of violence and appreciate the benefits of protective factors in risk assessment, formulation and management
- Competent in the use of the HCR 20 as a basis for conducting risk assessments in your clinical practice
- Able to formulate structured risk assessments and risk management plans
- Informed on the reasoning for using the SAPROF and able to use it in your clinical practice and research

About our speaker:

Dr Kerry Hinsby is a consultant clinical and forensic psychologist with over 15 years' experience in all levels of hospital security, prison and the community. She provides expert witness reports to courts in criminal and child protection cases. Her current post involves working clinically with individuals who have offended and also have a diagnosis of mental illness or personality disorder. Her role includes therapy, supervision, consultation and mentorship. She works within and consults to multi-agency risk assessment, formulation and management processes such as MAPPA, Prevent and parole hearings. She is also trained by the authors of the SAPROF a risk assessment tool often used in conjunction with HCR
