

This event is dedicated to the memory of Dr Monique Schelhase who passed away in the summer of 2024 after her battle with Cancer. Monique was a close colleague of both Rhys and Mary and played an integral role in facilitating the IH research that took place at Connect.

She was a clinical director at LYPFT, Specialist in Eating Disorders and SAS doctor. Her commitment to clinical work, medical education, leadership and management was recognised in 2022 by the Royal College of Psychiatrists as the Specialty Doctor/Associate Specialist of the Year.

Most of all she was a force of nature, an inspiration and an agent for change. You couldn't help but be impacted by her presence. It is for all these reasons that Mary and Rhys would like to honour her memory in this way and will invite you on the day to join them in making donations to her chosen charities - St Michael's Hospice and Yorkshire Cancer Research.
