

ADOS-2

Autism Diagnostic Observation Schedule, Second Edition

Monday 11th to Thursday 14th November 2019

The Met Hotel, King Street, Leeds, LS1 2HQ

Registration 9.00am, Start 9.30am, Finish 4.45pm (all four days)

Led by **Dr Carol Stott** from Beginning with A Autism Consultancy and Training, this comprehensive course provides in-depth coverage of ADOS-2.

The ADOS is a semi-structured, standardised assessment of communication, social interaction, and play or imaginative use of materials for individuals who have been referred because of possible autism or autistic spectrum disorders. The second edition (ADOS-2) improves an instrument already viewed as the gold standard for observational assessment of autism spectrum disorder (ASD). ADOS-2 is revised with a new toddler module, and revised algorithms for modules 1-3.

Over the four days this course provides delegates with:

- A mix of presentations and practical activities based on videos of ADOS administrations.
- comprehensive course workbook as well as all coding booklets required for administrations coding during the course.
- Ample time for questions and discussion

Pre Course Work:

You will be required to complete pre-course work practising using the instrument prior to attending (typically takes 2 hours). This will be sent to you approximately two weeks before the course.

Post Course Work:

To be completed by delegates who wish to be assessed for research reliability. To be completed within six months of the course and can take up to six hours in total. It involves coding 3 videos of ADOS-2 administrations as well as making a video of your own ADOS-2 administration and returning it to us for assessment.

Course Feedback:

Dr Carol Stott is a Chartered Psychologist (CPsychol) and Chartered Scientist (CSci) and a member of the British Psychological Society.

Carol spent 13 years in the University of Cambridge Department of Psychiatry carrying out research into genotype-phenotype associations in developmental disorder and with the University of Cambridge Autism Research Centre (ARC) investigating the population frequency of Autism Spectrum Disorders (ASDs). In addition to her training and consultancy work with BeginningwithA, she advises a number of research projects on methodology and implementation of screening and diagnostic tools.
